

- Question 1: For a given array, sum all the elements which are greater than 20.
 - [1, 50, 40, 3, 10] => Print result: 90

```
let arr = [1, 50, 40, 3, 10];  
let sum = arr.filter(n => n > 20)  
  .reduce((accumulator, current) => accumulator + current);  
console.log(sum);
```

- Question 2: For a given String array, return a new array which contains all string, length is greater than and equals to 5, and contains letter 'a'.

```
let arr = ['John', 'William', 'Christina', 'Tina'];  
let result = arr.filter(name => name.includes('a') && name.length >= 5);  
console.log(result);
```
